

MD REZAUL KARIM

Full-Stack Software Engineer — .NET · React · AI

Mirpur-6, Dhaka-1219, Bangladesh | +8801303316865 | mdrezaulkarim31295@gmail.com

[linkedin.com/in/mdrezaulkarim38](https://www.linkedin.com/in/mdrezaulkarim38) | github.com/mdrezaulkarim38

SUMMARY

Software Engineer with 3+ years of experience building enterprise applications using ASP.NET Core, C#, SQL Server, and React.js. Full-stack experience designing and delivering scalable ERP, CRM, and accounting systems. Applies SOLID principles, the Repository pattern, and clean architecture to keep systems maintainable as they grow. Recently extended core .NET expertise into AI engineering, building local-LLM applications (Semantic Kernel, Ollama) with production-grade resilience, observability, and API hardening.

TECHNICAL SKILLS

Backend: C#, .NET (Web Forms), ASP.NET Core (MVC, REST API, Web API), Semantic Kernel, Microsoft.Extensions.AI

Frontend: React.js, JavaScript, TypeScript, HTML5, CSS, Bootstrap

Databases: SQL Server, Oracle, SQLite, MongoDB

ORM: Entity Framework Core, Dapper

Architecture & Design: SOLID principles, Repository Pattern, Clean Architecture, Design Patterns

Testing: Unit Testing fundamentals, manual QA / integration testing across ERP & CRM modules

AI / LLM: Ollama (local LLM inference), Semantic Kernel orchestration, prompt engineering, streaming (SSE)

Resilience & Observability: Polly (retry, circuit breaker, timeout), Serilog, ASP.NET Core Health Checks

API Quality: FluentValidation, Output Caching, Rate Limiting

Tools & DevOps: Git, GitHub Actions, Jenkins, Docker, IIS, Postman

IDEs: Visual Studio, VS Code, Rider

Reporting: Crystal Reports, HTML

Concepts: REST API Design, Agile (Scrum), System Design, Background Job Scheduling (Hangfire)

PROFESSIONAL EXPERIENCE

Software Developer — iTech Velocity October 2025 – Present

Dhaka, Bangladesh — Real Estate ERP

- Developed and maintained an enterprise ERP system using ASP.NET Core and SQL Server
- Designed and implemented scalable backend REST APIs powering core ERP modules
- Built a customer feedback and self-service customer portal using ASP.NET Core Web API, enabling customers to submit feedback and track requests directly
- Worked across full-stack modules end-to-end, covering ASP.NET Core backend services and frontend components
- Improved system performance through query and API optimization, and maintained code quality through code reviews and structured testing

Software Developer — Synergy Interface Ltd. April 2023 – September 2025

Dhaka, Bangladesh

- Synergy CRM: developed a role-based CRM using ASP.NET Core 8, SQL Server, and React.js to manage tasks, candidate workflows, meetings, and team collaboration
- Smart Life Insurance: maintained modules for FA, UM, BM, and Customer Policy; implemented premium calculation and dynamic reporting
- Accounting Software: simplified a financial system into a modular accounting solution
- AccuStock: built an inventory and double-entry accounting system with integrated chat and email reporting

PERSONAL PROJECTS

Smart FAQ Chatbot — github.com/mdrezaukarim38/smart-faq-chatbot

- Built a context-aware, multi-turn FAQ chatbot using ASP.NET Core 10 (Clean Architecture — Core / Infrastructure / API), Semantic Kernel, and a local Ollama LLM (qwen3:8b), with a React 19 + TypeScript + Vite frontend
- Implemented multi-turn conversation memory with Semantic Kernel ChatHistory, trimming context to the last N turns to bound token cost while retaining full history
- Built session persistence with EF Core + SQLite (create, list, switch, delete sessions), surviving app restarts
- Implemented real-time token-by-token streaming via Server-Sent Events with a hand-serialized, contract-tested camelCase payload
- Added production resilience with Polly, FluentValidation, per-IP rate limiting, Serilog structured logging, and health checks (SQLite + Ollama probes)

AI Text Summarizer — github.com/mdrezaukarim38/ai-text-summarizer

- Built a full-stack AI summarization app using ASP.NET Core 10 (Controller-based API), Semantic Kernel, and a local Ollama LLM (qwen3:8b), with a React 19 + TypeScript + Vite + Bootstrap 5 frontend
- Implemented synchronous and real-time streaming (Server-Sent Events) summarization endpoints for word-by-word output in the UI
- Added production-grade resilience with Polly (retry with exponential backoff, circuit breaker, timeout) around all LLM calls
- Implemented observability with Serilog structured logging and liveness/readiness health checks, including an active Ollama connectivity probe
- Added API hardening: FluentValidation request validation, custom SHA-256-keyed output caching, per-IP rate limiting, and request size limits
- Designed a fully local, privacy-preserving architecture — no user data leaves the machine

AI Email Assistant API — github.com/mdrezaukarim38/AiEmailAssistant

- Built an AI-powered email generation API using ASP.NET Core and Ollama (local LLM)
- Implemented email drafting, tone rewriting, and reply suggestion features
- Designed a file-based logging system to track AI requests and responses

ERP for SME — shohug-enterprise.web.app

- Developed a full-feature ERP system including inventory management and reporting
- Implemented authentication, role-based access, and core business workflows

Bill Tracker — github.com/mdrezaukarim38/BillTracker

- Developed a role-based billing system with payment tracking features
- Designed a clean, user-friendly interface

EDUCATION

Bachelor of Science in Computer Science and Engineering

Southeast University, Dhaka | January 2022 – June 2026

Diploma in Computer Science and Engineering

Mir Samsul Islam Polytechnic Institute, Alamdanga, Chuadanga | June 2016 – May 2021

PROBLEM-SOLVING PLATFORMS

LeetCode: leetcode.com/supermanshuvo

StopStalk: stopstalk.com/user/profile/supermanshuvo

SOFT SKILLS

Strong communication and teamwork; a fast learner and adaptable, focused on writing clean, maintainable code, with experience working in Agile (Scrum) environments.
